AEGIR Marine B.V. & Propulsion Service

We are exclusive agents in the Principality of Monaco for **AEGIR-Marine B.V. & AEGIR-Marine Propulsion Service**.

Since its foundation in November 2000, AEGIR-Marine has transformed from a small service-directed company to a maker independent organization for stern tube seals and bearings, with offices in The Netherlands, Shanghai, Singapore, Namibia and the USA, as well as sales representatives in many countries. As an ISO 9001 (2000) certified company, AEGIR-Marine values quality and service to the highest level reachable.

AEGIR-Marine provides service on any type of stern tube seal when a vessel is in dock or afloat. They can even provide service underwater, for which they have an exclusive partnership with UPE in Vlaardingen. With service engineers all over the world, they do not have any restrictions regarding service locations – AEGIR-Marine can help you anywhere you need them to be.

To meet their own service standards, AEGIR-Marine has its own PRIME spares suitable for systems installed by Wärtsilä, Dover Japan, Japan Marine Technologies and many more on stock. They can also supply liners, spacer rings, zinc anodes, net cutters and all consumables suitable for every type of 'lip-type' stern tube seal installation – all from their warehouse in the Netherlands. AEGIR-Marine very own PRIME sealing system, type-approved by many class societies, has been tested to be equal to – if not better than – sealing systems supplied by the major original manufacturers.

To assist their customers further, AEGIR-Marine founded AEGIR-Marine Propulsion Service (AMPS) in January 2009. This division is specialised in repair and maintenance of bow thrusters and propulsion units, which can be done in their warehouse, in-situ or when a vessel is in dry-dock.
