Compressors

Via our channel of suppliers, we have an extensive range of OEM and replacement spare parts for most of the marine air and refrigeration compressors.

Our team of engineer's workshop design and produce spares in accordance with the most stringent international quality standards.

This allows us to provide all the necessary components to overhaul a compressor, from a small gasket to major items such as blocks, heads, and crankshafts.

At the moment we supply complete reconditioned units, rebuilds and tested in the suppliers workshop. Please find here below list of brands and models available.

Air Compressors	Refrigerator Compressors
Hamworthy (All models)	Carrier (Most models)
